On the Italian Design Day we showcase the quality of the Italian production system, a creator and producer of culture through objects and services that address the significant challenges faced by the entire world today, from inclusion to environmental protection. Italian design, through objects, establishes, beyond form and technology, new relationships among people and thus becomes part of a shared system of values globally. The Ministry of Foreign Affairs and International Cooperation is supportive of this crucial sector for the Made in Italy, and of the network of cultural and creative enterprises that work in close cooperation for the growth of this strategic sector, also within the area of digital and green transition.

All of Design Precinct's broad spectrum of products are originals, paying homage to the intellectual property and integrity of the creators and are produced in Italy by craftsmen who respect the need for sustainable beauty. Design Precinct was launched in 2018 with the sole purpose of bringing the finest expressions of design from Milan to Australia. Design Precinct makes it possible for Australian designers to create what they have always desired – beautiful and non-generic spaces with a passionate difference. Focusing on a shared belief system between all product contributors, Design Precinct draws on ethical values, such as only working with manufacturers that focus on sustainability, integrity and intellectual property of the original designers.
