ITALIAN INNOVATION, GLOBAL IMPACT

ADNEC - Hall 1 - Stand n. 1256 ,1160

Ministero degli Affari Esteri e della Cooperazione Internazionale

ITA ITALIAN TRADE AGENCY

OpportunItaly
Driving business growth with Italian excellence.

ITALIAN TRADE AGENCY - ITA

ITALIAN TRADE AGENCY

TRADE AND INVESTMENT
OPEN DOORS TO A WORLD OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

MESSAGE FROM THE ITALIAN TRADE COMMISSIONER

Dear Guest,

Welcome to the Italian National Pavilion at **ADIPEC 2026.**

This year, **52** Italian SMEs are exhibiting in the pavilion, part of a total of more than **169** Italian companies at the show. Together they span much of the oil and gas value chain, from pipes and drilling tubulars to gas turbines and compressors.

Italian industry has earned its place in the UAE's oil and gas market, and the results confirm it. In the first half of 2026, Italy became the second-largest supplier of oil and gas equipment to the UAE. Our market share climbed from **9.8%** to **17.3%** in a single year, and exports reached **€188.5** million. The UAE is a priority market for our companies, and these results reflect the trust placed in our technologies.

Many of our exhibitors are also developing solutions in decarbonisation, hydrogen and low-emission technologies, in step with ADIPEC's focus on resilient and intelligent energy systems. My thanks go to ANIMA Confindustria, ANIE, ANIMP and FEDERTEC, whose cooperation made this pavilion possible.

The year 2026 is also a milestone for the Italian Trade Agency, which celebrates its **centenary**. We are marking it with an expanded programme of exhibitions, business missions and matchmaking in the UAE through 2026 and all the way to next year.

I invite you to visit our exhibitors, ask them questions and find the right partners.

VALERIO SOLDANI
Italian Trade Commissioner
Director, ITA Dubai

ADIPEC

ADIPEC is the world's meeting point for energy and technology leaders, convening in Abu Dhabi from 3–6 November to translate ambition into action across the entire value chain.

Anchored by Strategic and Technical Conferences, it connects ministers, CEOs, engineers and innovators to build resilience today while scaling intelligent solutions that accelerate inclusive global progress.

As one of the largest energy exhibitions and conferences globally, ADIPEC brings together over 205,000 professionals and 2,250+ exhibitors across 30 country pavilions, creating a powerful marketplace for partnerships, procurement and technology adoption. From decarbonisation and digitalisation to maritime and logistics, its specialised zones spotlight solutions shaping the future of energy.

Hosted at ADNEC under the leadership of the UAE, ADIPEC showcases how energy, finance and technology can mobilise capital and capabilities at speed and scale. The programme explores the convergence of AI and energy, the next chapter of downstream, and the engineering breakthroughs driving operational excellence and net-zero pathways.

Across four days, attendees engage in high-level dialogue, technical deep-dives and curated networking designed to unlock market access and measurable impact. Whether a national oil company, technology disruptor, policymaker or industrial off-taker, ADIPEC is where strategies are shared, deals are done and cross-border collaboration takes flight.

By uniting producers, consumers, innovators and investors, ADIPEC powers progress— enabling secure, affordable energy, empowering people through intelligence, and delivering real-world impact for economies and the planet.

ANIE

Federazione ANIE, member of Confindustria, has been representing the Italian Electrical Engineering and Electronic industry for 80 years. With over 1,100 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transport.

Electrical Engineering and Electronic technologies represent the heart of the twin transition – green and digital. They are drivers of innovation and are essential for the modernization of existing infrastructure.

ANIE INDUSTRY FIGURES:

- 112 billion Euros of total turnover
- 440,000 employees
- 4% intra-mural R&D expenditure on total turnover

ANIMA CONFINDUSTRIA

ANIMA Confindustria - Federation of Italian Associations of Mechanical and Engineering Industries - represents the Italian mechanical sector within Confindustria. Founded in 1914, ANIMA gathers 34 associations and over 1,000 companies, employing more than 220,000 people, with an overall production value of €55.5 billion and an export share exceeding 58% (2024 estimates).

The Federation covers a wide range of industrial supply chains, including:

- Energy Generation, Chemical, Oil & Gas, Green Hydrogen and Nuclear Technologies (machinery, plants, components)
- Building Technologies (HVAC, construction systems, infrastructures, water technologies, infrastrutture and water treatment)
- Logistics Technologies (lifting, elevation and handling equipment)
- Food Technologies (processing machinery and plants for the food industry)
- Safety, Security & Environment (environmental protection, firefighting and personal safety)
- General Industry (plants, components and products for various industrial sectors)
- ANIMA safeguards the interests of Italian mechanical engineering worldwide, supporting its member companies in technical, regulatory, and economic matters, and promoting their know-how in international markets.
- With a strong focus on sustainability and innovation, ANIMA member companies are actively engaged in the energy transition. A dedicated working group within the Federation is committed to the research and application of hydrogen and nuclear technologies for energy production, reflecting the strategic role of Italian mechanics in shaping the global energy future.

FEDERTEC

In the highly developed context where product technology tends to converge, FEDERTEC, the Association representing the Italian industry of Mechatronic Technologies and Components for Fluid Power, Power Transmission, Smart Automation and Control of Industrial Products and Processes, is the point of reference for the industrial automation sector, focused on the integration of the different technologies and aimed at representing the entire value chain.

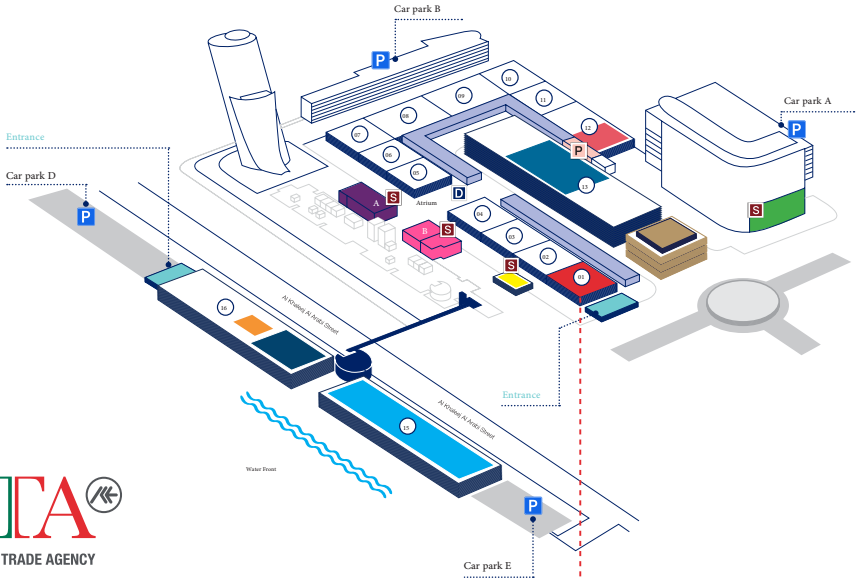

The member companies of FEDERTEC represent a leading part of the Italian economy and together, they show very remarkable values, with a global sector turnover exceeding 13 billion euro and a national market value of 9.6 billion euro at the end of 2024.

ASCOT INDUSTRIAL

Ascot is an Italian manufacturing group operating internationally in the power energy sector mainly focused on the production of generating sets (diesel, LPG, NG), hybrid technologies & Power Plants, designed in accordance to customer specifications at varying climatic conditions. Originally established in 1986, Ascot has since expanded its presence in over 60 countries throughout Europe, Africa, Middle East, Asia, Latin America and the USA. The "Ascot brand" is associated worldwide with high quality and reliability, tailor-made generating sets, long-life products, hybrid technologies, and special power solutions. Ascot's production is focused on Diesel, LPG & Natural Gas Generating Sets and on Hybrid Power Solutions tor Telecom, Mobile Generators, Rural Areas, Civil & Industriai and Modular Power Plants, and it consists of three product lines: Eco-Powered energy solutions, Hybrid-Powered products and systems, and special Engine-Powered generators. Ascot strives to maintain the highest standards of quality, manufacturing all products in Italy using 100% Italian and European components, standards and superior equipment.

DOUGLAS CHERO SPA

Douglas Chero S.p.A., founded in 1974, specializes in the production of high-quality forged valves for petroleum refining, offshore oil and gas, power generation, and process industries. Its production capacity has expanded from 3,000 to 40,000 pieces per month, supported by advanced manufacturing technologies and a modern facility covering 25,000 m², including 9,000 m² of covered area.

Douglas Italia, established in 1970 as a division of the group, is a fully certified manufacturer of steam traps, manifolds, strainers, filters, and sight flow indicators, serving petrochemical, chemical, power, nuclear, and offshore sectors worldwide.

With a strong in-house engineering division, the company develops specialized solutions for fluid and steam management. A dedicated R&D team continuously enhances products and designs new systems. In addition, comprehensive technical documentation—covering calculations, design, quality, and certifications—is provided to meet complex project requirements.

FARO BEARINGS

FARO Bearings is an Italian manufacturer specialized in the design and production of high-performance custom rolling bearings for demanding industrial applications. Founded in 1981, the company has over 45 years of experience in developing engineered bearing solutions for customers worldwide.

Our production range includes radial, axial and combined bearings with outside diameters up to 2,200 mm, manufactured according to customer drawings or specific application requirements. Thanks to our flexible manufacturing processes and extensive engineering expertise, we are able to supply both prototypes and small production batches, as well as larger series.

FARO Bearings serves a wide range of industries, with particular expertise in steel processing, metal rolling mills, paper and corrugated board production, oil & gas, machine tools, material handling, mining, and other heavy industrial applications where reliability and precision are critical.

TELEMA

Telema Company is operating in the market for over 50 years, offering solutions for a wide range of applications and a variety of power ratings.
The products are addressed to our customers that operate in most various markets of the energy (power generation and distribution), oil & gas, hoisting, marine, mining and the innovative applications of renewable energy.
Telema designs and produces load banks (container version for data center, off shore and on shore, etc), neutral earthing (for harbors, off shore and on shore, etc.), filter and braking/starting and surge arrester.
Nevertheless Telema cooperates as partner with important national and international Research Centers and laboratories (ENEA, CESI, CERN, LABO VOLTA) in the development of specific resistors for experimental applications that require deep knowledge of resistors designs.
Custom made design, flexibility and customer orientation are the milestones of our business philosophy.
Telema can propose solutions from few Kilowatt to multi Megawatt, from the small motors control to the tests of big gas turbines or to the special applications for R & D departments and test facilities.
Our power resistors are the expression of the Italian electromechanical industry, recognized as one of the leader in the world.

THERMOGAS IMPIANTI

Thermogas Impianti is an Italian manufacturer and system integrator specializing in midstream and downstream energy infrastructure. Established in 1992, the company executes the complete industrial cycle internally—encompassing engineering, fabrication, testing, and long-term maintenance.

Our manufacturing scope includes custom gas treatment and pressure reduction units, fiscal metering stations, biomethane grid-injection skids, odorization systems, and thermal utility plants. To support network decarbonization, our pressure equipment is certified H2-Ready for gas blends containing up to 10% hydrogen at operating pressures up to 90 bar.

We deliver scalable manufacturing capacity for global utilities and EPC contractors. Systems are produced in full compliance with ISO 9001, 14001, and 45001 quality frameworks, as well as European PED 2014/68/EU and ASME engineering standards.

WORLD IMAGE

We manage «on-the-fly» solvent changeover from MEA and DEA to MDEA and MDEA FORMULATED SOLVENTS, providing the solvent and new plant operation data thanks to dedicated online simulations. When an upgrade to the amine unit occurs, we can provide the engineering, skid-mounted filtration units, skid-mounted chemical injection package, and skid-mounted amine unit. Through EPC projects, we offer assistance from specialized operators for the commissioning of amine units and also proper on-site training for site workers.
