# ITALIAN TRADE AGENCY - ITA

ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multichannel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

## TRADE AND INVESTMENT

OPEN DOORS TO WORLD  
OF OPPORTUNITIES

### Find Your Italian Partner

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

# UNIDI

## Italian National Union Of Dental Industries

UNIDI (Italian National Union of Dental Industries), a founding member of FIDE (European Federation of Dental Industries), brings together the best of the Italian dental industry: over 110 companies producing equipment and materials for dentists and dental technicians.

The association represents the excellence of Italian dental manufacturing—innovative and constantly evolving—renowned worldwide for the reliability of its components, cutting-edge technological solutions, and modern design. This sector is among the global leaders in terms of business volume, technological innovation, and exports.

UNIDI carries out various activities aimed at protecting the rights of its members in their relationships with institutions and other key sector associations. Its expertise in regulations, trademarks, patents, and the protection of medical devices is recognized and appreciated both nationally and internationally.

Since its foundation, UNIDI's primary goal has been the international promotion of Italian dental companies through numerous initiatives both abroad and within Italy. Thanks to long-standing collaborations with ITA (Italian Trade Agency) and other relevant institutions, the association successfully organizes an increasing number of trade missions, group exhibits, and Italian pavilions at the most prestigious international trade fairs, contributing to the global spread of "Made in Italy."

Among its other activities, the association, through its Academy, offers training courses on regulatory topics as well as specific seminars on marketing and communication in the dental sector. Its expertise serves both companies and professionals, with particular attention to emerging and essential topics linked to current emergencies.

Since 1969, UNIDI has owned and organized Expodental Meeting, the leading dental trade show in Italy. This event is a must-attend gathering, even on an international level, and serves as a crossroads of experience, innovation, and tradition in the dental industry.

# ANDREW MEDICAL

Stand No. 4G04

Andrew Medical, a forward-thinking company, focuses on the research, development, and production of 3D-printed dental implants using titanium Ti6Al4V-ELI.

These implants feature a dense core and a porous outer layer, replicating the structure of natural bone.

The 3D-printed design promotes Dental Pulp Stem Cell adhesion and osteoconductivity, supporting bone integration while studies suggest the implant's surface may limit bacterial growth.
