

Building the Future with Italy

Engineering innovation, design, and sustainability
for tomorrow's infrastructure.

Sheikh Saeed Hall Stand n. SS1 D122

Building the Future with Italy

Engineering innovation, design, and sustainability
for tomorrow's infrastructure.

24 - 27 November 2025 | Dubai World Trade Centre

“Big 5 Global and Marble & Stone World remain essential platforms for showcasing Italy's strength in engineering, industrial systems, and construction technologies. This year, nearly 100 Italian companies will participate across both exhibitions - 58 at Big 5 and 40 at Marble & Stone World - demonstrating the depth of our industrial capability and the continued demand for Italian innovation in the region. Italian companies continue to hold a strong global position, with the construction technologies sector reaching €18.69 billion in production and €12.38 billion in exports in 2024. Our presence in the UAE, supported by initiatives such as OpportuniTALY, reflects our long-term commitment to the country's evolving infrastructure needs and to strengthening commercial ties with partners across the region.”

Mr. Valerio Soldani

Trade Commissioner to the UAE and Oman
ITA - Italian Trade Agency

Sheikh Saeed Hall 1 Stand No. SS1 D122

Italian Trade Agency - ITA

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

BIG 5 GLOBAL

Big 5 Global is the Middle East, Africa, and South Asia's foremost construction event, returning to the Dubai World Trade Centre from 24–27 November 2025. It serves as a pivotal platform uniting over 2,500 global exhibitors showcasing more than 65,000 products encompassing building technology, machinery, interior construction, HVAC, solar solutions, and digital construction services. Drawing an expected audience of 85,000+ professionals from 165 countries, the event facilitates unparalleled networking, collaboration, and business development opportunities.

Built around key industry challenges, Big 5 Global focuses on accelerating sustainable construction, enhancing project efficiency through digital tools, strengthening supplier networks, and bridging skills gaps for future-ready cities. Hosted at multiple halls within DWTC, the event features over 180 expert speakers delivering 120 CPD-certified sessions, providing deep insights into emerging trends and practical solutions.

Over four days, attendees engage in live product demonstrations, panel discussions, and exclusive networking designed to unlock new markets and foster innovation across the construction and urban development sectors. Big 5 Global powers progress by connecting governments, industry leaders, architects, contractors, and innovators—driving transformational projects that shape resilient and sustainable cities for the future.

ANIMA CONFINDUSTRIA

Association

ANIMA Confindustria - Federation of Italian Associations of Mechanical and Engineering Industries - represents the Italian mechanical sector within Confindustria. Founded in 1914, ANIMA gathers 34 associations and over 1,000 companies, employing more than 220,000 people, with an overall production value of €55.5 billion and an export share exceeding 58% (2024 estimates).

The Federation covers a wide range of industrial supply chains, including:

- Energy Generation, Chemical, Oil & Gas, Green Hydrogen and Nuclear Technologies (machinery, plants, components)
- Building Technologies (HVAC, construction systems, infrastructures, water technologies, infrastrutture and water treatment)
- Logistics Technologies (lifting, elevation and handling equipment)
- Food Technologies (processing machinery and plants for the food industry)
- Safety, Security & Environment (environmental protection, firefighting and personal safety)
- General Industry (plants, components and products for various industrial sectors)

ANIMA safeguards the interests of Italian mechanical engineering worldwide, supporting its member companies in technical, regulatory, and economic matters, and promoting their know-how in international markets.

With a strong focus on sustainability and innovation, ANIMA member companies are actively engaged in the energy transition. A dedicated working group within the Federation is committed to the research and application of hydrogen and nuclear technologies for energy production, reflecting the strategic role of Italian mechanics in shaping the global energy future.

CASEITALY

CASEITALY is a new and innovative format to promote the Italian companies of the building envelope and technical components. It has been developed by four benchmark Associations (ACMI, ANFIT, ASSITES, PILE), with the support and direction of FINCO Federation (Federazione Industrie e Costruzioni) and the decisive support of MAECI (Italian Ministry of Foreign Affairs and International Cooperation), through ITA (Italian Trade Agency).

CASEITALY symbolises the best of Italian production, values and qualities. It represents the sectors of windows, doors, gates, shutters, roofings, tinsmithery, technical curtains, flyscreens, sunscreen protection systems and components, safety harnesses and belts, façades and other sectors linked to construction.

With CASEITALY, the focus of the foreign operators attending BIG5 Dubai will be on the value of the "Made in Italy" of the building envelope, of thousands of companies and their operators that represent an excellence recognised (if not yet fully known) by the rest of the world.

CASEITALY
— ■ —

FINCO is the Federation of Industries for Construction Products, Plants, Services, and Special Works for Building, Road Maintenance, and Cultural Heritage.

It brings together 40 associations representing the following sectors:

- Building Envelope (aluminum, wood, and PVC windows; metal building sheets; continuous and ventilated facades; sun protection and automation systems; tilt doors; integrated sunshade systems; components for external protection and darkening; zenithal systems; industrial, commercial, and garage doors and gates; door automation systems; roofing systems; gutters, downspouts, and eaves; door hardware and handles)
- Building Systems (industrial and prefabricated)
- Sound-Absorbing and Safety Barriers
- Rockfall and Avalanche Protection
- Traffic Signs and Road Safety Equipment (including illuminated signage)
- Roadside Assistance Companies
- Heavy Lifting and Exceptional Transport Companies
- Historical Monuments Restoration
- Archaeological Excavations
- Renewable Energies
- Metal Carpentry
- Cut and Bent Rebar for Reinforced Concrete
- Galvanizing Industries
- Fasteners Industries
- Composites Manufacturing and Installation Industries
- Seismic Joints
- High-Performance Metal Sheet Elements for Structural Connections
- Scaffolding
- Fall Arrest Devices
- Fire Protection Systems
- Lifting Systems
- Water Well Construction Companies
- Geognostic Investigations
- Certification Bodies
- Condominium Management and Heat Accounting Companies
- Unexploded Ordnance (UXO)

Significant corporate entities also participate in the Federation as associate members, integrating their expertise within the Federation's specific supply chains.

Mission: The Federation aims to enhance the value and visibility of each member.

FINCO acts particularly when collective action is more effective than that of individual associations or companies.

FINCO acts on behalf of its members through:

1. Parliamentary and Executive Institutional Relations
 - The Federation actively lobbies for the adoption of laws and legislative decrees that safeguard the sectors when associations and member companies align on specific issues.
 - It proposes changes in general legislative procedures (e.g., the Financial Act and related measures).
 - It monitors and encourages the work of public administrations on significant issues such as intergovernmental decrees and EU certification marks for construction products.
2. Coordinating Efforts
 - Unites Italian manufacturers of materials, components, and services in the construction sector.
3. Participation in Ministerial Working Groups
 - Collaborates with the Ministry of Enterprises and Made in Italy (MIMIT), the Ministry of Environment and Energy Security (MASE), and the Ministry of Infrastructure and Transport (MIT) to support each member.
4. Collaboration with National and International Organizations
 - Works with bodies in the construction, infrastructure, and mobility sectors.
5. Organizing Internal Task Forces and Consultancy Services
 - Provides expertise and professional support to members and their companies in various sectors.
6. Promoting Sector-Related Events
 - Expands market opportunities for represented sectors through events and initiatives.

ACMI – ASSOCOSTRUTTORI CHIUSURE E MECCANISMI ITALIA

Association

ACMI is the Italian Association that gathers the manufacturers of technical doors, windows and shutters for every type of civil and industrial application, in any type of construction and regardless of the material used for their making, as well as components and accessories to complement and integrate them.

The Association offers support in the issues of specific interest to the represented the market sector, keeping relations with public and governmental organizations, testing and research laboratories, standardization and certification bodies, Italian and foreign, in charge of the areas of interest of its members.

ACMI prepares and offers business consulting services helping its associates to achieve the qualifications needed for the production and marketing of products of their interest.

ANFIT - ASSOCIAZIONE NAZIONALE PER LA TUTELA DELLA FINESTRA MADE IN ITALY

ANFIT's main purpose is to promote quality windows conceived, designed and crafted entirely in Italy by Italian companies, inspecting and ensuring that strict quality, safety, environmental protection and energy savings criteria are met for consumer satisfaction.

ANFIT's goal is to protect the Italian quality market and production chain in compliance with the regulations. ANFIT's commitment is to the technical and qualitative improvement and upgrade of manufacturing, regardless of the material used. ANFIT carries out promotional activities at public administrations, professional studies and media in general. Its main purpose is to protect the Italian quality market and production chain abroad as well. With a clear procedure, ANFIT determines the origin and quality of the product, thus enabling the end user to decide, independently and for their sole interest, on the purchase of windows made in Italy. This value must also be conveyed as best as possible to international markets, in order to support and increase the added value of such products.

ANFIT informs its Members of technical and regulatory updates, and takes part in the Italian and European decision-making processes that determine the rules of the market to protect Italian window manufacturers.

Services provided include: the use of the QUALITY ANFIT marking and Energy Label; issuance of certificate of origin; special rates for laboratory tests; technical information with respective seminars and training courses; insurance policy for manufacturers, installers and consumers.

ANFIT participates at events, fairs, conferences, and fosters promotional campaigns with press articles to disseminate the Italian-made ANFIT window. The top companies in the sector of window and window frame production and installation operate within this Association. The window frames sold in Italy are required to bear the CE marking, but manufacturing the window frame in Italy requires higher standards. The designer is required to verify that, before they are installed, window frames comply with a number of features such as wind resistance.

The NPD value (No Performance Determined) does not discharge either the window-maker nor the designer from liability: ANFIT helps reduce risk and liability ensuring window frames perform according to national and international regulations. ANFIT arose from the need to defend and enforce compliance with regulations that differ very much from one another due to the distinctive features of our country. The obligation for the CE marking for window frames arose to protect the consumer and standardise production processes, but does not eliminate the obligations and responsibilities of manufacturers. The window frames manufactured by ANFIT members bear the Numbered Energy Label and the Installation Label, to make the whole production chain traceable.

ANFIT is the first association in Italy to have stipulated two insurance policies with "Reale Mutua Assicurazioni" to protect and guarantee manufacturers/installers and consumers.

ASSITES – ASSOCIAZIONE ITALIANA TENDE, SCHERMATURE SOLARI E CHIUSURE TECNICHE OSCURANI

ASSITES' role is to represent the knowledge of blinds in their entirety – including solar shading, shutters, outdoor blinds, indoor blinds, and insect screens – in the national market and consumer perception. It actively works to spread knowledge of industry issues and to monitor market requirements, helping companies to meet them.

Qualified companies of any size – that manufacture and supply products and/or raw materials in the sector of solar shading, shutters, indoor and outdoor blinds, and insect screens – can become members of the Association. Additionally, professionals (technicians, consultants and scholars), sales agents or representatives and associations or industry bodies can also be part of the Association, as associate members and supporters.

ASSITES offers day-to-day assistance on industry entrepreneurship, and constant updates through news, information capsules and internal communications, monitoring trends and market developments at the national and international level and offering support to companies that wish to undertake a process of internationalization.

LIANA

Since 1979 we have been producing soft and rigid profiles and gaskets in different plastics, applying technical processes which include co-extrusion, three-extrusion and post-extrusion. We have progressed throughout our more than forty years' experience and today are a well-established benchmark for many international industries and distributors.

'From project to product' summarises perfectly our approach to customers' needs. One of our main strengths is the design and production of new custom profiles for a host of applications. Further, scrupulous control tests carried out at key points of the production cycle guarantee finished products of the highest quality.

VIGHI SECURITY DOORS

DESIGNING SECURITY. SINCE THE BEGINNING.

For over 50 years, Vighi has crafted high-security, beautifully designed doors—100% made in Italy. Every day, skilled artisans gather in our Italian workshop to merge cutting-edge tech with fine craftsmanship. A home's entrance is both a shield and a design statement. That's why we design security—creating doors that protect what matters most.
