ITA - Italian Trade Agency is the government agency, part of the Ministry of Foreign Affairs and International Cooperation, that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and an extensive network of 87 offices in 74 countries, ITA provides information to foreign companies wishing to establish business relations with Italian partners.

The Italian Trade Agency has always supported the internationalization of Italian companies, organizing Italian pavilions at the most important international trade fairs, business visits to Italy, workshops and seminars abroad to present Italian technologies and ideas.

ITA also provides support, advice, promotion and training to Italian small and medium sized enterprises. Using the most advanced multi-channel promotional and communication tools, to promote the excellence of Made in Italy throughout the world. Our office in Madrid is the ideal gateway to the Spanish and Portuguese markets.

integratori
& salute 

Unione Italiana Food is the leading association for the direct representation of food product categories in Italy and one of the most important at the European level. It brings together 530 member companies and more than 900 brands, representing approximately 80% of packaged food products in the Italian market.

The Association comprises 26 product categories, ranging from coffee and pasta to frozen foods with a particularly strong focus on food supplements, and generates a total turnover of €60 billion, of which €23 billion derives from exports.

Within this framework, Integratori & Salute, the food supplements sector of Unione Italiana Food, brings together over 180 companies, a scale that positions it as the leading European industry body in terms of turnover and market relevance.

To its high level of representativeness, the Association is committed to advocating for the industry, while protecting consumer health and promoting quality, safety, and transparent information for food supplements.

Nutri supplement science

Company Profile

AVD Reform was established in 1978 with the idea of developing natural products to preserve psychophysical wellness. We believe in the therapeutic power of medicinal plants and mushrooms, which we have always handled with a scientific approach. AVD supplement formulations are supported by evidence and data from studies conducted in partnership with universities and hospitals that enable the safe and effective use of our nutraceuticals. Respect for nature is paramount, an outlook that translates into a daily commitment to manufacturing using pollutant-free, standardised and high-quality starting materials.

All our conception, development and production processes are based on our extensive phytochemical knowledge of plants and their active ingredients. We test all the information gleaned from the traditional use of medicinal plants and mushrooms, as well as obtaining concentrated derivatives to develop modern delivery system, such as drops, capsules and macerates.

Company Profile

Estratti360 is an innovative start-up born from the idea of two young technicians with a ten-year consolidated experience in production of plant-based ingredients.

The ten-year experience gained by the team in production of botanical extracts has allowed the company to develop the ExtrAI (Extracts obtained by Artificial Intelligence), an extraction method thanks to which it is possible to produce high-quality botanical extracts for food, cosmetic and nutraceutical.

The use of existing extraction technologies in combination with the use of innovative techniques based on artificial intelligence (AI) allows us to produce and supply high-quality natural ingredients.

FARMALABOR

Company Profile

Farmalabor, founded in 2001 in Canosa di Puglia, is a leading company in the distribution of raw materials for pharmaceutical, cosmetic, and food use. It is present in Milan with a commercial office and in Canosa di Puglia with two production sites: one dedicated to the handling and storage of raw materials for cosmetic, food, and herbal use, and the other dedicated to the storage and repackaging of pharmaceutical active ingredients (hormones, psychotropic substances, antibiotics, and multipurpose products).

Farmalabor can also rely on several warehouses dedicated to the storage of laboratory equipment and packaging materials, for a total surface area of 18,000 square meters.

Advanced logistics, integrated operations management, and a computerized system designed to optimize processes make Farmalabor a market-oriented, efficient, and responsive company, capable of operating competitively throughout Italy and internationally.

biokyma

Company Profile

We have been dealing with Official Plants since 1991, our family (Bini-Cornioli) has been maturing its experience in the "field" since the early 1980s. From the very beginning the technical knowledge is recognized by the market.

Thus began the development of the first machinery and the import of raw materials from the countries of origin; 30 years later we are proudly a leading Italian company in the processing of medicinal plants. Dried Herbs of 350 Botanical Species, 500 Plant drugs in various cuts. The dried herbs are processed on our production lines in Italy. Many machinery are designed by the various botanical species require a high level of know-how at all stages of the process, which can only be acquired through practical trials and experience over more than 40 years.

We produce customized plant blends following the customer's formulation and following them throughout product development. With the experience gained from numerous imports and the needs of the market, we select the origin of each individual plant based on the best active ingredient content. The dried herbs are processed on our production lines. Each cut is available in multiple qualities.
