During the 14th Five-Year Plan period, grain circulation security capabilities have been enhanced

In terms of infrastructure, the construction of grain storage and logistics projects has been intensified. The intact storage capacity of standard grain warehouses nationwide has exceeded 730 million tons, an increase of 58 million tons from the end of the 13th Five-Year Plan period. In 2024, the total industrial output value of grain enterprises nationwide exceeded 4 trillion yuan (€0.48 trillion). **(Information Office of the State Council of the People's Republic of China)**
