ITALIAN TRADE AGENCY

ITA - ITALIAN TRADE AGENCY is the Governmental agency that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

WELCOME LETTER

Dear Companies,

I would like to extend to all of you a warm welcome to the Offshore Technology Conference (OTC) 2019 and its host city, Houston.

This year the Italian Pavilion will present a selection of 15 Italian companies leaders in the oil & gas sector, and one training & research Institute. Collectively, they will exhibit a wide range of advanced technologies, products and services, able to meet the highest customers' requirements, even tailor-made.

The Italian Pavilion is a unique opportunity to discover the state of the art of Italian technology in the oil & gas sector. In 2018 Italy exported almost 12.63 billion USD worth of industrial machinery in the US, a rise of 12.5% compared to 2017.

In 2018 Italy ranked 11th among suppliers of mechanical components and fittings for the US.

According to Anima Confindustria Meccanica data, the macro sector "machines and plants for the production of energy and for the chemical and oil industry - assembly of industrial plants" in 2018 recorded an increase in production compared to 2017 (+ 1,8%), as well as exports (+ 1,9%) and investments (+ 6,6%) and the potential trend could be confirmed this year.

The oil & gas Italian sector is vibrant and eager to establish new relationships around the world. Our task, at the Italian Trade Agency, is to facilitate these connections. OTC 2019 is a wonderful opportunity to make these connections happen.

We are pleased to welcome you at the Italian Pavilion: let us know if we can be of any help.

We are looking forward to working closely with you in Houston and elsewhere.

Sincerely,

Antonietta Baccanari
Trade Commissioner

hydraulics & 3D printing

PRODUCTS:

Control Systems; Design & Construction; Heat Exchanger/Transfer; Hydraulic Systems; Valves & Actuators; Research & Development.

Expertise in hydraulic solutions and 3D Metal Printing. Aidro, based in North Italy, is a family-owned company with 40 years of experience in valves, manifolds & heat exchangers. Aidro designs and produces customized hydraulic solutions, both in conventional and additive manufacturing, in the internal departments with metal 3D printers machines. With Additive Manufacturing Aidro produces spare parts, lightweight solutions & fast prototypes in various metal (Aluminum, Stainless Steel, Inconel, etc.) Attention to the quality is guaranteed by the ISO9001 and AS9100. The raw materials and components are produced in Italy or in EU countries. Production is 100% tested and the goods are meticulously packed in order to ensure the customers receive the best products on time.

DE PRETTO INDUSTRIE

PRODUCTS:

Subsea Systems; Marine Equipment & Services; Design & Construction; Pipeline Systems and Equipment; Mechanical Systems; Ships, Boats, Vessels Equipment.

De Pretto Industrie is an integrated supplier of bespoke solutions for offshore applications with in-house engineering and fabrication capabilities. The products that we can develop are:

- *Mission equipment for construction vessels: we can cover the design, construction, test and integration of equipment for pipe laying systems, mooring systems, lifting and handling operations.*

- *Subsea swivel connector Easy Lock: it is an API 6A, 17D certified (PSL 3G) and fail-safe product, which is used to reduce the installation and tie-in time in deep water of flexible flowlines with vertical connectors. It can be customized to the specific project requirements: up to 15,000 psi of working pressure, installation depths to 3,500 m and bore diameter to 36". Furthermore, its metal seals guarantee a design life of 30 years.*

- *Equipment for subsea operations: starting from functional requirements, we can develop special solutions to carry out operations from shallow to ultra-deep water.*

DG is an Italian engineering, management and contracting company founded in the 60's. DG is a recognized worldwide provider of professional technical services in a wide range of fields, mainly focused on: Oil & Gas (upstream, midstream, downstream), Power Generation, Transmission & Distribution, Renewable, Environment, Chemical and Petrochemical.

DG strength to manage complexity is the key factor to a 360° control of each Project. DG provide outstanding know-how and 50-years experience in a wide range of services, offering tailor-made solutions to meet Client's specific needs.

Our main integrated services are: Design & Engineering; Environmental Consulting & Study; HSE Engineering & Management, Security Services, Project & Construction Management, Procurement, EPC Contractor, Early Production Solutions, Operations & Maintenance. DG is able to have a significant worldwide presence essential to manage challenging projects. DG main skills are: Structured Project Organization, Effective Flow of Information, Continuous Monitoring of the Results, Experience with Challenging and Fast Track Project, Multidisciplinary Task Force Activation.

ERRE.DI.**PRODUCTS:**

Flexible Hoses and Hose Connections;
Connections and Fittings; Flexible Pipe;
Pipeline Systems and Equipment.

Since the early Sixties ERRE.DI. has been manufacturing hose connections and quick couplings for a wide range of industries, delivery quality products thanks to its R&D department and advanced machinery.

ERRE.DI. has quickly included flexible hoses into its product range, which is distinguished for its quality, accuracy and innovation, and expanded into the Chemical, Petrochemical and Oil&Gas markets.

Today ERRE.DI. manufactures several fittings, such as VR Camlock Couplings, Quick Release and Dry Break Couplings, in common and exotic materials: stainless steel, Duplex, Super Duplex, Hastelloy, Inconel, aluminum, brass, galvanized steel and bronze. ERRE.DI flexible hoses are made in metal, rubber, PTFE and composite.

EXA is a worldwide known manufacturer of industrial gasket machinery, in particular for:

- Spiral Wound Gaskets
- Camprofile Gaskets
- Insulation Gaskets
- Die Molded Rings.

EXA also supply Laser Marking equipment suitable for any kind of gaskets and for any material (metallic and non-metallic). EXA machines are the highest technology available on the market in the gasket manufacturing field and they are designed to meet the requirements of the global market. EXA can propose also custom-made machinery designed according to the customers specifications or special needs. EXA have also a commitment to provide customers with superior long-term after sales service that differentiate us from competitors. EXA equipment is 100% Italian technology and manufacturing. If you manufacture gaskets EXA can supply the right machine.

KAMET

PRODUCTS:

Design & Construction; Mechanical Systems; Offshore Structures/Systems; Pump Equipment and Services; Ships; Boats; Vessels; Equipment; Valves & Actuators.

Let Kamet shape your future! Kamet a leader in providing steel profiles around the world. Our aim is to provide a prompt and accurate service of customer's needs and we are strongly committed to supporting both manufacturing companies and warehouses. We supply a wide range of solid and hollow special steel, stainless steel and titanium sections. These profiles are studied and manufactured according to the customer's requirements. Our design engineering and highly cost-effective solutions offer cost saving solutions for small and large volumes.

LOTERIOS

PRODUCTS:

Corrosion/Abrasion Control; Heat Exchanger/ Transfer; Materials; Pipeline Systems and Equipment; Pressure Vessels; Process Equipment & Services

LOTERIOS is an Italian company specialized in supplying mill products, bulk materials (pipes & fittings), piping spools and systems, process equipment and any kind of special items in exotic materials such as Titanium, Zirconium, Tantalum, Nickel based alloys, Duplex and Super Duplex stainless steel. LOTERIOS fabrication activity includes the construction of Shell and Tube Heat Exchangers, Columns and Towers, Condensers, Reactors, Pressure Vessels & Storage Tanks, Piping, Piping Systems and Spargers in the reactive metals and corrosion-resistant alloys. LOTERIOS Customer Care and Service philosophy maintains an impressive quantity of Titanium pipe and fittings items at stock ready for off-the-shelf delivery, as well as semi-finished products and raw materials. Worldwide Engineering Companies, EPC Firms and Final Users of the Oil&Gas, Chemical, Petrochemical, Mining and Fertilizing Industries are our regular Customers. LOTERIOS is part of Titanium Metal Corporation (TIMET), the world's largest fully integrated manufacturer and distributor of Titanium metal products.

PETROL INSTRUMENTS

PETROL Instruments S.r.l.

PRODUCTS:

Instruments & Control; Monitoring and Instrumentation; Pipeline Systems and Equipment; Process Equipment & Services.

PETROL INSTRUMENTS manufactures PD flow meters for liquids (double and single case), for industrial and custody transfer applications, master meters, digital control valves, tank provers and strainers entirely in its own factory in Italy. Petrol products are always reliable with excellent performances, very reduced maintenance and low cost of ownership. Product range from 1" to 16" with max flow-rate up to 2000 m³/h; wide range of construction materials (carbon steel, cast iron, stainless steel etc.); wide range of accessories; Excellent Accuracy and Repeatability; Low Pressure Drop; Compact Design; Long Service Life; Wide Range of Accessories; Conformity with International Standards: PED, ATEX, OIML R117, ISO 9001; International Approvals for Fiscal Applications: Malaysian (Sirim), Kazakhstan, MIGAS (Indonesia), Russian, Nigerian and Chinese Approval. Petrol Instruments PD flow meters are MID certified as a component for use with in a measuring system as agreed within WELMEC.

PIPELINE & GAS EXPO 2020, PIACENZA

PRODUCTS:

Pipeline Equipment & Services; Pipeline Coatings; Gas Compressors; Gas Metering; Mapping of Underground Networks; No-Dig Technologies; Steel, Cast Iron and HDPE Pipes; Trenchers; Valves, Actuators & Fittings; Welding Equipment.

PIPELINE & GAS EXPO is the only European exhibition fully dedicated to the mid-stream sector and the gas, oil & water distribution networks. With its highly specialized exhibition format, PGE - which takes place every other year - is the ideal meeting point among the companies operating in the project, construction and maintenance of oil, gas and water pipelines, gas distribution networks (both primary and secondary) and water networks with the relevant suppliers of equipment, machinery, materials and software they need. PGE is therefore a qualified information updating point also for public and private companies specialized in the management of distribution networks and related services.

RINA**RINA****PRODUCTS:**

Consultants; Geosciences; Inspection and Testing; Research & Development; Safety; Environmental Protection & Regulatory Services; Training.

RINA supports the sustainable growth of energy operators worldwide, to meet growing market demands both in oil and gas and power generation (conventional and renewables), and power transmission and distribution.

We provide a vast array of solutions, including certification, QA/QC services, vendor inspection, expediting and testing, offshore surveys, O&M engineering, and consulting, helping operators meet sustainability targets as well as ensure compliance to contractual specifications and international standards.

We are aware that digital innovation represents a challenge for all key energy players, and we work closely with them to transform this challenge into an opportunity. For this reason, digital technology runs through all of our services, from artificial intelligence and big data to predictive data analytics, blockchain and digital twins.

SAVEGUARD ITALIA

PRODUCTS:

Power Generation; Production System Valves; Subsurface Valves; Survival System/Vessels/ LifeBoat/Jacket; Tubulars & Piping; Valves & Actuators

Saveguard Italia Srl was founded in Italy in 2005, a company formed by young, motivated and experienced staff, which has led to the development of products to meet the needs of customers. Saveguard is a company highly specialized in the engineering and production of textile and metal products for use in passive fire protection, thermal insulation, personal protection equipment, flexible insulating products and specific products for the cogeneration industry, petrochemical, and waste treatment. The Automotive division is also a leader in the sector for the production of thermal protections and insulation for the automotive industry. Our company is able to provide the design of insulation systems and fire protection systems with high performance for the production of electricity and the recovery of flue gases in combined cycle power plants. We are the number one insulation company.

TECNO MECCANICA EMILIANA

POMPE FANGO E COMPONENTI PER OIL & GAS
MUD PUMPS AND COMPONENTS FOR THE OIL & GAS INDUSTRY

PRODUCTS:

Drilling; Inspection and Testing; Manufacturing/
Machine Shop; Mud Pumps.

Tecno Meccanica Emiliana S.r.l. (TME) was founded in 1995. Over the years TME has gained a significant experience in projecting, manufacturing and repairing components for Oil & Gas Industry. Now TME is a Mechanical Workshop specialized in the production of components for Mud Pumps, Drawworks, Crown / Travelling Block, and other components for drilling. Engineering, design (3D CAD system), metalworking, CNC Machining (CAD / CAM system) and Assembly departments are in house. TME is certified in accordance to ISO 9001:2015, API Q1-3081, API 6A-1545, API 7-1-1109, API 7K-0455 and API 8C-0293. The Company employs a technical and manufacturing organization consisting of qualified personnel (26 people) and modern work tools in two different facilities having a production area of 1200 and 2000 sqm each. Due to this and thanks to the diversified company structure, TME internally performs the majority of manufacturing processes.
