ITALIAN TRADE AGENCY

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD  
OF OPPORTUNITIES

The Italian Trade Agency (ITA) is a government agency coordinated by the Ministry of Foreign Affairs and International Cooperation. It supports the business development of Italian companies abroad and promotes foreign investment in Italy.

ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses through its motivated and modern organisation and widespread network of overseas offices. ITA uses the most modern multi-channel promotional and communication tools to promote the excellence of 'Made in Italy' worldwide.

The ITA operates through a worldwide network of 69 offices and 18 satellite offices in 74 countries. Our Madrid office is the ideal gateway to the Spanish and Portuguese markets.

As part of the "Technology Days" initiative, the Italian Trade Agency (ITA) is pleased to present a selection of 15 Italian companies from the electrical and electronics sector. This brochure was created to help our Spanish partners connect with solid, experienced businesses ready to collaborate on the energy transition and infrastructure development.

These companies offer practical solutions across the entire supply chain. Their expertise ranges from traditional power distribution and industrial automation to data centers, smart grids, renewable energy, and electric mobility. They are reliable businesses, well-equipped to support the Iberian Peninsula as it grows into a key hub for sustainable digital infrastructure.

We are confident that the workshop and networking session at the Consulate General of Italy in Madrid will be the starting point for strong, lasting partnerships. We invite you to browse through the company profiles inside and wish you a highly productive event.

Giovanni Bifulco  
Director - ITA Office in Madrid

## FEDERAZIONE NAZIONALE IMPRESE ELETTROTECNICHE ED ELETTRONICHE

Federazione ANIE, member of Confindustria, has been representing the Italian Electrical Engineering and Electronic industry for over 80 years.

With over 1,100 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transport. Electrical Engineering and Electronic technologies represent the heart of the twin transition – green and digital.

They are drivers of innovation and are essential for the modernization of existing infrastructure.

### ANIE INDUSTRY FIGURES:

112 billion Euros of total turnover

480,000 employees

4% intra-mural R&D expenditure on total turnover

## HEATING & COOLING

“We design, manufacture and distribute inverter heat pumps and air conditioning systems that will help shape a better world”.

Maxxa was founded with this clear purpose – a mission that, more than 30 years on, continues to inspire and guide the company’s spirit today.

Our mission is to ensure environmental comfort and human well-being by developing cutting-edge solutions for heating and climate control. We can proudly claim to be the company that designs, develops and manufactures heating and air conditioning products Made in Italy.

We are an Italian company active in the energy sector since 1985, specializing in advanced plug-in solutions for power generation and distribution. Our core focus is on MV air-insulated switchgear and eHouse systems for grid connection of photovoltaic plants and battery energy storage systems. We have connected approximately 4.2 GW of PV and 4 GW of BESS across Europe, delivering tailor-made eHouse solutions to multiple markets.

Our portfolio includes fully factory-assembled eHouses equipped with MV switchgear (up to 40.5kV), protection panels, and SCADA systems. These prefabricated, bolted-steel units require no on-site welding and can be installed in just 2–3 weeks, enabling fast grid connection.

Sustainability guides our approach: we use eco-friendly materials and air insulation instead of SF<sub>6</sub>, while promoting energy efficiency, waste reduction, and long-term value for customers and communities.

ESA S.p.A. has been a trusted global automation partner for over 50 years, delivering integrated solutions for visualization, management, control, and motion.

We design and develop proprietary hardware and software technologies, including HMIs, Industrial PCs, SCADA, Servo Drives, Servo Motors, and I/Os.

Our modular platforms, engineering expertise, and hands-on technical support enable us to deliver both standard and tailored solutions that meet the evolving needs of machine builders and manufacturers worldwide.

By enhancing machine performance, process efficiency, and data visibility, we help manufacturers build smarter, more connected, and more competitive operations.

Built to Run is more than a tagline – it reflects our commitment to creating reliable technology that performs, every day.

# GETRA

MATCHING ENERGIES

Born in the 1949, Getra is an Italian Group leader in Design, Manufacture and Supply of Power Transformers, Distribution Transformers and Grid Solutions.

Within its long history, our Group has achieved a track record of 250.000 Transformers supplied in Europe, America, Asia and Africa and an outstanding experience in Service and Engineering.

The mission of Getra is to cooperate with Universities and Research Centers and to strengthen long-lasting relationships with its Customers: our Group is proud to be a reliable partner of all the main Utilities and Contractors in Italy and worldwide.

With 5 Companies, 2 advanced manufacturing Plants, 2 Branches in Africa and Middle East and with more than 310 employees, Getra Group covers the needs of an increasingly dynamic Global Market with a complete range of tailor made, efficient and high quality solutions. 100% Made in Italy.

## A BUSINESS OF COL GROUP

For over 60 years, IMEQUADRI has been a leading player in the market of electrical switchgears and electro-mechanical systems.

Since 2024, our integration into COL GROUP has enhanced our operational capabilities, unlocking strategic industrial synergies with sister companies IMEMONT, COL Giovanni Paolo and Teamware.

Supported by a workforce of over 400 specialized professionals and 4 infrastructure hubs in Italy (Turin, Milan, Bergamo, and Catania), the Group develops integrated, high-performance solutions for high, medium and low voltage transmission and distribution networks.

We actively drive the energy transition by systematically investing in R&D and leveraging technical talent as the primary asset for technological evolution.

# MENNEKES

## MY POWER CONNECTION

The MENNEKES Group is a leading manufacturer of industrial plugs and sockets and charging solutions for electric mobility. Since 2014, MENNEKES' "Type 2" charging plug has been the standard for electric vehicles across Europe, in accordance with EU regulations. Founded in 1935, the company has subsidiaries and agencies in more than 90 countries and employs around 2,000 people worldwide.

After more than 10 years of significant progress in the field of electric mobility, it supports companies and individuals in addressing their charging needs in various daily contexts, with a medium- to long-term approach and a range of targeted services aimed at maximizing the value of charging infrastructure usage.

# ORTEA NEXT

Founded in 1969, ORTEA is a leader in the design and manufacture of innovative products and customized solutions for Power Quality and Energy Efficiency. Thanks to a network of offices and dealers on all Continents, Ortea products are now installed, maintained and operating in more than 100 Countries worldwide. The process of renewal and continuous improvement strengthens Ortea's leadership as your ideal partner to meet the challenge of the global energy transition.

Products: Voltage stabilizers, SAG and Micro Interruptions compensator, LV Transformers and reactors, Power factor correction systems, Active harmonic filters, Energy efficiency smart devices, Energy saving voltage optimizers.

# SDI | FUTURE YOU CAN TRUST

SDI is an Italian company specialized in industrial automation, SCADA and remote control systems, ICSS, DMS and energy management solutions for utilities and industrial infrastructures. The company provides integrated hardware and software solutions for the monitoring, control and optimization of critical processes across sectors such as energy, oil & gas, water and transportation. Through its established eXPert ecosystem, continuously enhanced and deployed worldwide across mission-critical infrastructures for decades, SDI delivers advanced solutions for supervision, distribution management, alarm management and energy efficiency. Backed by strong engineering expertise and decades of industry experience, SDI helps customers improve operational reliability, safety, sustainability and the digital transformation of industrial and utility networks.

# SEA MARCONI

Sea Marconi was established in Turin in 1968 based on a business concept by Vander Tumiatti. The company now operates in the key sectors of energy and the environment, with sustainable solutions for the management of transformers and other electrical equipment filled with insulating fluids (core business). Sea Marconi occupies a leading market position in the sector, with 3000 clients across 5 continents. We have offices in Italy, France, Spain Argentina and Uruguay, and operate in other areas of the world through qualified partners.

## A company of R&S

Tesar company was established in 1979 and it was the first Italian company to implement the technology for the production of Cast Resin Transformers. With 40 years' experience in design and manufacturing, Tesar is today able to provide to its clients Medium Voltage Cast Resin Transformers with rated power up to 25 MVA and primary voltage up to 36 kV.

More than 100,000 Tesar transformers have already been successfully installed in the five continents of the World.

With high-end electrical products and innovative solutions, we are a trusted partner to our customers having our processes ISO 9001, ISO 14001 and ISO 45001 certified.

Tesar has also developed a new product line, EcoPlus2030, to reduce the CO2 emission both during the manufacturing process and the working life of their transformers.

Tesar is proud to claim fully approved CESI Laboratory and an impressive portfolio of routine, type and special tests.
