## ITALIAN TRADE AGENCY

The Italian Trade Agency is the government organisation which promotes the internationalisation of the Italian companies, in line with the strategies of the Ministry for Economic Development. ITA provides information, support and advice to Italian and foreign companies.

In addition to its Rome headquarters, the Italian Trade Agency operates worldwide from a large network of Trade Promotion Offices linked to Italian embassies and consulates and working closely with local authorities and businesses.

UCoMESA - Italian Association of Construction Equipment Manufacturers Created in 1951 within ANIMA, Ucomesa gathers the most qualified, major Italian manufacturers of construction equipment and machinery.

Ucomesa members are distributed into the following six product groups:

- Excavation, drilling, boring and pile driving equipment
- Aggregate processing equipment
- Concrete production, transport and pouring equipment
- Tower cranes
- Road construction equipment
- Prefabrication, materials testing, construction materials production, etc.

Ucomesa is particularly focused on matters related to export and carries on either directly or in cooperation with ITA/ICE Agency promotional activity which includes participation in several trade fairs both in Italy and abroad.

Ucomesa - together with other Italian trade associations – is member of Federbeton, which is aimed at representing the chain of material production and manufactured products made of concrete and related plants.

Within CEN (European Committee for Standardization) Ucomesa experts are involved in the activity of TC 151 Working Groups for drawing up standards concerning member-companies' production.

For over 25 years, it has been successfully engaged in the manufacture of Blocks Making Machine, Splitters, Tumbling Machines, Automation for Concrete Products Plants, Dosing and Mixing Plants, as well as in the construction of all the models of molds requested by the client for the production of cement products. Currently it is the only Italian manufacturer of automatic plants for the production of BLOCKS in CLC (CELLULAR LIGHT CONCRETE). Thanks to continuous innovation and technological development, EURimpianti is able to realize plants and finished products of the highest quality. The company offers all the know-how for the production of concrete products. Design, construction, assembly, training and support are guaranteed by EURimpianti, during production, by the intervention of competent technicians. Many services are provided to customers with extreme timeliness and professionalism. Consultancy and design of Special Systems, Tele-assistance through Remote connection, spare parts and maintenance.

We have been manufacturing shoring props and scaffoldings for more than 60 years. We help construction companies across the world to complete their projects. And we have the perfect solution for your company too.

### Building props

Props are the starting point in every multi-storey building construction. We can provide you all type of props, classified into: light props, DIN EN 1065 props, pull-push props, props with fork, aluminium props and shoring towers.

### Scaffoldings

GBM scaffoldings have been used for several years across the world for construction and maintenance works. Our range of scaffoldings includes scaffoldings with bushings, scaffoldings with pins, pipe-coupling scaffoldings.

Industrial Lift, a division of Boat Lift Co. Is the result of decades of technical experiences in the field of Lifting and Handling Systems, with particular focus on the needs of operators dealing with Industrial Sites, Production Lines, Stocking Areas, Steel and Concrete industries, etc.

Our Corporate approach is based on the ability to evaluate Customers' specific needs with the purpose of responding to requirements at any production stage, from design to implementation. Advanced technology, up-to-date softwares and machineries, new materials that bring to a final product of undisputed quality and reliability. Industrial Lift self-propelled systems can be suitably designed for handling loads of considerable weight and dimension and our skilled technical staff is constantly receptive to optimize and customize any of our vehicles according to different requirements.

Annamaria Bertocchi

The Italian company Neròn Pumps has developed a patented high pressure water pump with integrated motor, hydraulically driven. The pump is compact, powerful, versatile, quick to install in any mobile industrial vehicles. The need for high performance combined with water and light weight has become a must for the manufacturers of mobile machines like sweepers, plaster machines, concrete pumps, concrete mixers, urban cleaning vehicles, asphalt machines, pavers, excavators, conveyor belts machines, drilling machines, ditching machines, refuse collection vehicles, tractors, fishing boats and ships. In combination with water-hydraulics, the pressure washer becomes a precious component for systems meant to operate in cleaning vehicles, hoses and tubes, removing concrete incrustations, removing paint, posters, graffiti or smog from buildings, cleaning of streets, cleaning cement drums and benches, side walks, walls, removing rubber from airport runways and roads, demolition, sandblasting, restoration and plaster removal, disinfection, cleaning silos, tanks, spraying chemicals, reclamation removing rust, old paint and algae from boats, cleaning fishing nets, fire suppression, removing dust in tunnels and mines. The pumps can also be used also with salt water.

Nuova Mondial Mec srl is a manufacturer of a wide range of stone processing machines since 1979.

In the early '80s, Nuova Mondial Mec was imposed on the market with its stone floor polishing machines. At a later stage production was enlarged to include radial and bench cutting machines and stone slab saws, which put it at the top in the world ranking for the manufacture of machines and equipment for the building and natural stone industries.

Today, with a range of over 150 different models, we are able to meet the most varied needs and applications.

The success is due to that we are ready to tackle every new challenge, meeting the specific requirements of our customers that can have a reliable partner.

We have sold thousands of machines in 40 countries around the world and this just confirms the validity of our motto – Reliability, Robustness and Simplicity.

STM is a manufacturer of Bulk Materials Handling equipment, with strong expertise in the concrete placing systems, especially Roller Compacted Concrete (RCC). STM manufactures Belt Conveyors Systems, comprehensive of:

- Concrete Placers;
- Swinger Conveyors;
- Telescopic Placers;
- Tripper Conveyors;
- Stacker Conveyors;
- Overland Conveyors;
- Mass Concrete Conveyors;
- Bridge Conveyors;
- Tower Conveyors Systems;
- Self mobile Conveyors;
- Aggregates Conveyors Systems;
- Bucket elevators.

STM covers the full process of supply, from feasibility study to lay-out design, detail design, production, pre-assembly, cold commissioning, full commissioning on-site. The whole production of Conveyor Systems is carried out by CNC automatic machines in order to guarantee cutting hedge quality of every single component. Automatized welding stations ensure error proof operations. After sale service is at high level with remote assistance and remote management of the plant. STM is certificated to work around the globe (e.g. UL/CSA, Ghost).

Roberto Ambra

From 29 to 31 October 2020 the Piacenza Expo showgrounds will host the third edition of GIC - Italian Concrete Days, the only Italian event dedicated to machinery, equipment, products and technologies for the concrete industry, from production to construction, from concrete flooring to precast concrete, from refurbishing to demolition of reinforced concrete structures, even in seismic areas.

The first edition of 2016 had already left the perception that it was the winning show formula: a vertical - but at the same time transversal - exhibition, for a specific sector such as concrete, which opens on a very wide spin-off. The results confirm the validity of the GIC formula: at the 2018 edition, 245 exhibitors attended the show, including some of the most important brands in the sector, while visitors of the exhibition were 4,909.
