30 SEP TO 2 OCT 2025

DUBAI WORLD TRADE CENTRE (DWTC)

## Green Energy. Italian Ingenuity.

Advancing water and energy solutions for a greener tomorrow.

# Italian Trade Agency - ITA

ITALIAN TRADE AGENCY

## TRADE AND INVESTMENT

OPEN DOORS TO A WORLD  
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

## FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

# DUBAI ELECTRICITY AND WATER AUTHORITY (DEWA) - ORGANISER

Dubai Electricity and Water Authority PJSC (DEWA) organises WETEX. DEWA is a member of the Dubai Supreme Council of Energy, which aims to support Dubai's vision to build a sustainable future.

DEWA was formed on 1 January 1992 by a decree issued by the late Sheikh Maktoum bin Rashid Al Maktoum to merge Dubai Electricity Company and Dubai Water Department, which previously operated independently of each other. Both organisations were established in 1959 through the foresight of the late Sheikh Rashid bin Saeed Al Maktoum, then Ruler of Dubai, with the government supporting the bodies in their objective of making adequate and reliable supplies of electricity and water available to the people of Dubai.

On 12 April 2022, the shares of DEWA (PJSC) started trading on the Dubai Financial Market (DFM). DEWA is the largest company on the DFM, with a market capitalisation of 125 billion (\$34 billion). The wide interest from local and international investors affirms DEWA's position as a globally leading sustainable innovative corporation. It also underlines the attractiveness of Dubai as a global capital market.

The Water, Energy, Technology and Environment Exhibition (WETEX), organised by DEWA, supports Dubai's vision of a sustainable future. Held annually under the directives of Dubai's leadership, it serves as a platform to showcase innovations and trends in energy, water, and sustainability, while connecting local and international companies to share expertise and best practices.

## 9DOT

### 9dot – Smart Power for Sustainable Infrastructure

Energy Efficiency | Remote Control | Made in Italy

9dot is an Italian company that designs and manufactures intelligent power systems for efficient and sustainable infrastructure. With a strong focus on energy optimization and remote management, 9dot solutions are ideal for wireless networks, IoT, smart cities, and renewable energy sites.

At WETEX, 9dot showcases how smart power platforms can reduce energy waste, improve system reliability, and support the transition to clean, off-grid energy.

All products are proudly **Made in Italy**, designed to operate in harsh and remote environments, and compatible with solar, battery, and hybrid energy systems. With advanced control features, 9dot helps operators monitor, protect, and optimize energy usage at every site.

**nCore Lite** is a compact, modular DC power distribution system. It allows full monitoring and control of each output channel, remote configuration, and robust protection—perfect for smart, efficient energy deployments in off-grid or hybrid-powered infrastructures.

**Gigasync** is a modular power platform supporting up to 12 output ports. It functions both as a PoE injector and as a direct power terminal, providing electrical protection to connected devices and enabling precise monitoring of energy consumption. Its flexible architecture makes it ideal for managing complex systems with high energy efficiency requirements.

9dot empowers infrastructure operators to cut emissions, reduce OPEX, and achieve full visibility and control of their energy resources—enabling a smarter, greener, and more sustainable future.

## AIR CLEAN

Air Clean designs, manufactures and installs Air depollution, Odour Control, VOC removal and Biogas Cleaning equipment using proprietary bio-technologies and "conventional" chemical/physical tech (Chemical washing, Activated carbon, Wet dust and Dry dust removal systems, Composting plant, etc., all of them in our range), for municipal and industrial sector.

Company offers solid waste/sludge composting/biodrying systems using breathable fabrics and completely automatic bridge cranes and aerated platforms.

The access to the latest technologies and continuous research allows Air Clean to provide the best solution for every application, by using stand alone or multi-stage technologies, integrating all available technologies to best meet project.

## ALFA WATER

Alfa Water S.r.l. is an Italian company based in Sedico, in the province of Belluno, specialized in the design and production of advanced water treatment and filtration solutions. Founded in the heart of the Dolomites, a UNESCO World Heritage site, Alfa Water stands out for its commitment to environmental sustainability and the adoption of innovative technologies.

### Expertise and Areas of Application

Alfa Water offers a comprehensive range of manual, semi-automatic, and automatic filters made of stainless steel (AISI 304, AISI 316) and special alloys such as SAF 2205, SAF 2507, and 254 SMO. The company's products comply with international standards including ASME, PED, ATEX, and SHELLDEP, ensuring high levels of quality and safety.

- Main application sectors include:
- Drinking water and wastewater treatment
- HVAC systems and cooling towers
- Shipbuilding and desalination plants
- Industrial processes and water recycling
- Irrigation and agriculture

### Innovation and Sustainability

Alfa Water is continuously engaged in research and development to enhance filtration efficiency and reduce environmental impact. By combining engineering expertise, craftsmanship, and attention to detail, the company delivers reliable, long-lasting products that contribute to the preservation of water resources.

# AMBIENTE INGEGNERIA SRL

AMBIENTE INGEGNERIA S.R.L. has gained a lot of experiences in revamping, upgrading and ex-novo designs of existing and new sewage and industrial treatment plants in order to adapt them to the increasingly restrictive rules and standards imposed by European legislation.

Also part of AI's know-how is automation for process control using alternate cycle process control which currently has over 180 full scale application in Italian country.

## BRSI SRL

For over 20 years, Bilanciarsi has supported organisations and public administrations in building transparent, compliant, and effective ESG strategies.

At the core is the ESG Check-Up, a fast online tool that assesses environmental, social, and governance performance, offering instant insights, improvement recommendations, and easy sharing with stakeholders - an ideal starting point for any ESG journey.

Bilanciarsi guides clients through materiality analyses, data collection, and the drafting of clear, standards-aligned reports, while supporting companies in obtaining certifications related to legality, gender equality, diversity and inclusion, and sustainable event management. In addition, it helps companies in the improvement of their Ecovadis rating.

With smart, practical solutions, Bilanciarsi transforms sustainability into a true driver of value and lasting impact.

## DIGIMATIC ROBOTICS

Digimatic Robotics is an Italian innovative SME focused on the research and development of next-generation robotic systems. Our mission is to create intelligent, adaptable robots that can operate safely and effectively in both industrial and domestic environments.

We are currently developing a quadruped robot designed for applications such as inspection, security, and assistive services. The system integrates advanced mechatronics, real-time control, and AI-based decision-making, with the goal of achieving high mobility, robustness, and autonomy in complex scenarios.

As a technology-driven company, we are actively seeking strategic partners, research collaborations, and investment opportunities to accelerate the development and industrialization of our solutions.

With a multidisciplinary team and a strong vision for the future of robotics, Digimatic Robotics aims to become a key player in the European robotics landscape, delivering reliable and accessible robotic platforms that meet real-world needs.

## ECOLIBRÌ SRL

Ecolibri Srl is a company established in 2016 that operates in the renewable energy sector, with a primary focus on wind power. It was founded within its parent company, A.C.E. Srl, which has been producing industrial electrical wiring since 1967.

The company's core business is the design, development, production, marketing, installation, and maintenance of small-scale vertical axis wind turbines (3.5kW, 10kW, 20kW) for electricity generation. These turbines can also be integrated with other renewable energy sources, enabling the creation of hybrid on/off-grid systems, with or without battery storage.

Between 2016 and 2020, Ecolibri signed agreements to open four representative offices with dedicated showrooms in Mozambique, Eswatini (formerly Swaziland), Moldova, and Dubai. A key milestone in this period was the start of a synergistic collaboration with Coral Lodge in Mozambique, where Ecolibri's products were installed, transforming the resort into an open-air showroom.

On 7 March 2024, Ecolibri installed a 10kW vertical axis wind turbine within the new technology hub at the Rochester Institute of Technology (RIT) Dubai campus. This achievement represents an important milestone and reflects the company's strong partnership with this prestigious university.

## ELIXE SRL

### Elix Srl – Surface Innovation for Industrial Excellence

Elix Srl develops advanced industrial coating systems with a focus on UV-cured technologies for pipes, cylinders, and metal components. Our tailor-made solutions combine speed, energy efficiency, and superior surface quality.

#### Highlights

- UV-cured coating: fast polymerization at low temperatures
- Automated, modular lines for seamless integration
- Precise process control and repeatability

#### Why Elix

- Reduced cycle time and energy consumption
- Sustainable and eco-friendly solutions
- Proven expertise in metal surface coating
- International experience with customized systems

Elix builds durable machines that enhance productivity, reduce costs, and drive sustainable growth.

## GALIGANI FILTRI SRL

Galigani Filtri manufactures in Italy filter presses and feeding pumps for solid-liquid separation and sludge dehydration. From manually operated machines to fully automatic models, all our machines are equipped with advanced safety features to ensure secure processes.

With a rich history dating back to 1958, we've earned a reputation for Made in Italy production, ensuring reliability, quality, and customer satisfaction. With a presence across 5 continents and over 3000 systems installed, Galigani Filtri brings specific expertise in solid-liquid separation.

Situated in a modern facility in the countryside of Siena, our company designs systems to address the unique challenges of each application. Our qualified technicians provide timely pre and post-sale assistance, our on-site laboratory is equipped to run filtration tests to determine the parameters crucial for optimal filter sizing.

Our diverse production encompasses chamber filter presses, membrane filter presses and feeding pumps. Ranging from manually operated machines to fully automatic models controlled by PLC and tele-assistance systems, our products cater to various needs.

## GRUNDFOS WATER TREATMENT ITALY

Grundfos has acquired Culligan's commercial and industrial business in Italy, France and England. With this acquisition, Grundfos aims to invest in the growth of the water treatment business by also leveraging the expertise it has developed worldwide in pump technology. The new business unit is called Grundfos Water Treatment Europe.

With the expansion of the portfolio in the water treatment sector, Grundfos will be able to respond to the needs of its customers, ensuring better water quality as well as more efficient after-sales service.

Customers can expect advanced solutions and services, backed by the power of innovation and a shared commitment to delivering excellence in all areas of water treatment.

Grundfos Water Treatment designs, installs and maintains extraordinary swimming pools in the public and private sector, as well as providing technological solutions for water softening and filtration for public, private or industrial facilities.

We also offer various solutions for water reuse and recycling, as well as desalination plants with water and energy saving modules. Our know-how is our strength, with highly specialised professionals within our workforce. With a view to environmental sustainability, Grundfos WT offers water- and energy-saving solutions to overcome the problem of water scarcity.

## HYTEK SRL

Hytek S.r.l., a world leader in the marketing of products for primary water treatment, has been operating for over 35 years. The company is widely appreciated and recognized by both the market and the installation sector.

Hytek maintains a global presence through its partners, offices, and warehouses located in Serbia, Egypt, Turkey, and Saudi Arabia. This international network ensures strong product availability and reliable technical know-how worldwide.

In recent years, Hytek has invested significantly to make customer satisfaction its top priority. The company is dedicated to sourcing high-quality products and working with qualified suppliers, while also providing competent technical and planning assistance. In an increasingly demanding market, Hytek's mission is to deliver added value by offering competitive pricing without compromising quality.

This commitment has led to strong partnerships with leading global producers in the water treatment sector. Among them are DuPont (ion exchange resins, Filmtec membranes for reverse osmosis, Omexell ultrafiltration), Veolia (filter cartridges, process membranes, and Electrodeionization systems), CodeLine (pressure vessels for reverse osmosis membranes), Pentair Water (fiberglass tanks, Siata and Fleck valves), Fedco Pumps (high-pressure pumps and energy recovery systems for brackish and seawater RO), Grundfos (efficient pump solutions), and ECOLAB (RO chemical products). These trusted collaborations highlight Hytek's credibility and its role as a key distributor in the global water treatment industry.

## ECOMONDO – ITALIAN EXHIBITION GROUP SPA

ECOMONDO - the green technology expo - is the benchmark event in Europe and the Mediterranean basin for technological and industrial innovation in the green & circular economy sectors.

Ecomondo is the meeting place where industrial groups, stakeholders, policy makers, opinion leaders, local authorities, research bodies and institutions come together and put in place the key elements that define the strategies for the development of the EU's environmental policy.

We host the leading companies in environmental services, solutions and technologies. Our exhibiting sectors cover water management, waste as a resource, textiles, bioenergy, site & soil management and protection, transport, agriculture and sustainable cities.

We support the visit of decision makers and delegations of professional visitors. Ecomondo also offers a Buyers' Program for companies, municipalities and other professionals in need of new suppliers and technologies.

## MACPLAST SRL

MacPlast Srl, founded in 1985, specializes in the production of HDPE fittings and custom components for water and gas networks. Based in Belforte all'Isauro (Marche, Italy), the company relocated in 2008 to a modern facility powered by geothermal and solar energy, making it nearly self-sufficient.

Operating in over 60 countries, MacPlast supplies fittings, valves, flanges, repair saddles, line hydrants, and solutions for irrigation, fire prevention, alternative energy, and wastewater systems.

Quality is ensured through an advanced in-house laboratory with testing aligned to UNI EN ISO standards, covering pressure resistance, dimensional checks, and OIT. MacPlast is ISO 9001:2015 certified, guaranteeing consistency in production and logistics.

Focused on innovation and customer needs, the company combines SME flexibility with automated processes, offering tailored support from design to production. With its expertise and reliability, MacPlast has built a strong international reputation as a trusted partner in water and gas distribution.

## MAXA HEATING & COOLING – ADVANTIX SPA

"We design, manufacture, and distribute inverter heat pumps and air conditioning systems that help shape a better world." This has been Maxa's guiding mission since its foundation more than 30 years ago, and it continues to inspire the company's spirit today.

Over the years, Maxa has grown into a key player in residential, commercial, and industrial climate control solutions. Environmental comfort, sustainable growth, and environmental protection are the results of the dedication and expertise the Maxa team brings every day to the design and production of heating and air conditioning systems.

Our mission is to ensure environmental comfort and human well-being by developing cutting-edge solutions for heating and climate control. We proudly design, develop, and manufacture all our products in Italy, maintaining the highest standards of quality and innovation.

Through continuous research and development, Maxa offers one of the most comprehensive and competitive ranges in Europe. Today, our heat pumps cover sizes from 6 to 350 kW, meeting the diverse needs of clients across multiple sectors.

## NARIA SECURITY

### **Naria Security protects your energy.**

Alarm sensors, insensitive to false alarms, for the prevention of theft and vandalism of photovoltaic panels, inverters, batteries, and copper cables.

We design, develop, and produce anti-theft sensors in plastic optical fiber, easy to install and maintain, to protect assets and avoid the resulting costs of system downtime. We mainly protect photovoltaic systems, fences, copper cables in ducts or in cable trays, tanks, and ventilation ducts.

The sensors and the cable in plastic optical fiber are Made in Italy. Each electronic board and each meter of cable are tested internally, and all products are covered by a 5-year warranty.

We export all over the world, from Canada to Mongolia, from South Africa to Sweden. Our systems are installed in different climatic situations, even extreme ones. Our products are used to protect every type of photovoltaic site—on the roof, on the ground, on trackers, or shelters. We protect the panels and cables that power wells, wastewater purifiers, landfills, charging stations, parking lots, communication towers, and more.

We are also specialized in customizing our anti-theft solutions, even where other alarm systems (cameras, barriers, volumetric, etc.) are ineffective or inapplicable. We provide design consultancy, installation assistance, and post-sales follow-up.

## OCMI OTG SPA

The group was established in 1921 by Mr. Alfredo Gusti under the name of Gusti Alfredo S.p.A. Since the very beginning the core business has been both the manufacturing and the engineering of mechanical components with a special focus on gears and transmissions. A strong relationship with the Navy and the Railway industry was immediately established for the production of gears and gearboxes. During 1977 OCMI was established. This company main business was and still is the engineering and manufacturing of glass machines. In 1986 Gusti Alfredo SPA spin-off all its assets into a Newco named O.T.G. and also moved to a new premise in Milano (Via Venezia Giulia,7) 2005 OCMI and OTG merged into OCMI-OTG Spa.

## OSMO SISTEMI S.R.L.

OSMO SISTEMI is a renowned water treatment company that has been providing sustainable solutions to clients worldwide for 40 years. Our core activity is creating efficient and cost-effective solutions for treating primary water, greywater, and light industrial effluents.

Our innovative approach includes the use of state-of-the-art technologies such as reverse osmosis, nanofiltration, ultrafiltration, microfiltration, rapid filtration, chemical conditioning, and ion exchange for water desalination, purification, remineralization, and the removal of heavy metals and other contaminants.

We incorporate eco-friendly and energy-efficient techniques that minimize energy consumption and environmental impact during purification processes. OSMO SISTEMI offers a wide range of solutions and services, from small-scale applications to large industrial projects. Our goal is to provide high-quality drinking, industrial, or agricultural water with ad-hoc engineered solutions for every challenge, always with respect for the environment.

With an experienced team of professionals committed to excellence, OSMO SISTEMI's consistent track record has made it one of the most trustworthy companies in the industry today.

LIGHTING

ELECTRICAL SYSTEMS

Established in 1904, Palazzoli is a leading manufacturer specializing in high-quality electrical systems and lighting solutions.

Palazzoli operates through two dedicated divisions: "Electrical Systems" and "Lighting". Each division provides specialized solutions designed specifically to address the unique requirements serving diverse sectors including Industry, ATEX, Infrastructure, and Marine. Palazzoli delivers reliable and innovative equipment tailored for challenging environments.

Palazzoli maintains a significant global presence, with notable strength in the Middle East, actively catering to markets such as the United Arab Emirates, Saudi Arabia, Qatar, Kuwait, Oman, and Bahrain. Through customized solutions and comprehensive support, Palazzoli effectively meets the dynamic demands of these regional markets.

With sustained innovation, rigorous quality control standards, and an unwavering commitment to excellence, Palazzoli has consistently positioned itself as a trusted global partner in electrical equipment and lighting solutions.

Palazzoli is certified: ISO9001, ISO14001, ISO45001.

## RIENERGY ESCO SRL

Rienergy was founded by leveraging over a decade of experience in the renewable energy sector. From the beginning, we have operated across the entire renewable energy systems chain, driven by innovation and sustainability.

Initially, Rienergy focused on the acquisition of oilseeds in different regions of Romania, working closely with farmers' associations and brokers. We specialized in procurement services capable of sourcing various types of biomass. One of our strengths has always been the ability to support buyers at every stage, ensuring transparency and reliability.

Over time, our focus shifted to more specialized sectors such as biomethane production and high-quality composted mixed soil improver, made primarily from buffalo manure. This transition led to the creation of Bioenergy, a company under the Rienergy group, through which we expanded our commitment to eco-friendly solutions. Our integrated approach actively contributes to the generation of renewable energy and helps reduce the environmental impact of agriculture and livestock farming.

This evolution reflects our dynamic nature and ability to anticipate the needs of a rapidly evolving market. Our projects are developed with a circular vision, where each waste stream becomes a resource — from biogas to compost, from the farm to the soil.

Remaining true to our mission, we continue to work toward a more sustainable future by supporting the energy transition and offering concrete solutions to meet environmental and economic challenges.

## RINA

RINA is a multinational company supporting clients worldwide in building strong, resilient, and sustainable businesses. With over 6,300 professionals in more than 70 countries, we offer multidisciplinary expertise across energy, marine, civil infrastructure, mobility, and heavy industry sectors.

Our mission is to guide organisations through their energy transition journey by delivering innovative, safe, and sustainable solutions. We help energy players meet environmental goals, comply with international standards, and enhance long-term asset value. From site characterisation to impact mitigation and project design, RINA blends technical excellence with environmental responsibility.

Our Energy Engineering team provides comprehensive services across the entire lifecycle of both traditional and renewable energy projects—from concept development to decommissioning. We combine innovation and safety to support meaningful, future-ready growth.

RINA is also at the forefront of hydrogen technologies. We deliver precision engineering and integrated solutions for hydrogen production, storage, and end-use, offering a sustainable response to the global decarbonisation challenge.

Through engineering consultancy, inspections, laboratory testing, and R&D, RINA supports clients at every stage—from design and management to operation and maintenance. Our commitment to quality, innovation, and sustainability makes us a trusted partner in shaping a cleaner, more efficient world.

## SITA SRL

Founded in 1982, SITA SRL is a pioneering company specializing in the design and manufacturing of UV water treatment systems. Our mission is to provide innovative and reliable UV disinfection solutions to ensure safe and clean water for diverse applications, including municipal, industrial, and residential sectors.

With over four decades of experience, SITAUV has established itself as a leader in the UV disinfection industry, known for cutting-edge technology and a strong commitment to excellence. By leveraging UV-C technology, our systems effectively eliminate harmful microorganisms, offering a chemical-free and environmentally friendly alternative to traditional disinfection methods.

SITAUV is dedicated to research and development, continually advancing technology to enhance efficiency, reliability, and ease of use. Our team of experts works closely with clients to provide customized solutions that meet specific needs and regulatory requirements.

Quality and customer satisfaction are at the core of our operations. Our manufacturing processes follow stringent quality control measures, ensuring the durability and performance of our products. We also provide comprehensive after-sales support, including maintenance services and technical assistance.

With a global presence and a strong network of partners, SITAUV is committed to promoting water safety worldwide. Trust SITA SRL – SITAUV for innovative, efficient, and sustainable UV water treatment solutions.

## SAER ELETTROPOMPE SPA

SAER Elettropompe is a leading Italian manufacturer with over 75 years of experience in the design and production of high-quality electric pumps and motors. Renowned for its engineering excellence and Made in Italy production, SAER delivers a wide range of solutions for water handling across industrial, civil, and marine sectors.

A key area of specialization for SAER is the development of corrosion-resistant pumps for demanding environments. The company provides advanced solutions in super duplex stainless steel, ideal for reverse osmosis (R.O.) systems and seawater desalination.

SAER also excels in pumps for wastewater and water treatment plants. From submersible sewage pumps to vertical multistage, split casing, and end-suction models, SAER ensures optimal efficiency, reliability, and durability—even in aggressive environments.

With a broad portfolio that includes both standard and customized solutions, SAER supports engineering firms, OEMs, and end users worldwide. Backed by in-house R&D and flexible production, the company responds quickly to complex specifications and adapts solutions to customer needs.

Through constant innovation and unwavering commitment, SAER continues to be a trusted partner in advanced fluid handling, helping customers meet the challenges of water scarcity. Thanks to its Italian production, SAER also guarantees exceptional lead times and fast, reliable delivery worldwide.

# SYNCRETISE SRL

## **Sensing the invisible. Protecting what matters.**

Syncretise was founded by lifelong friends bound by decades of trust, shared purpose, and a common passion for flight. With backgrounds as fighter, commercial, and helicopter pilots with VTOL expertise, alongside a globally recognized passive radar scientist, we know exactly what's needed to protect complex airspaces—because we operate in them every day.

Backed by world-renowned expertise in passive radar and the scientific excellence of Italy's RaSS LAB (Radar and Surveillance Systems Laboratory), we are developing PRIMUS (now at TRL5). This AI-powered passive radar system is 90% software and 10% Commercial-off-the-Shelf hardware, capable of detecting and tracking drones and birds using ambient signals such as Wi-Fi, TV, and 5G. It operates without emitting radiation, requires no invasive infrastructure, and does not compromise nature.

PRIMUS offers decision-makers in aviation, critical infrastructure, and urban security a sustainable, ethical, and real-time airspace picture. It's designed by people who've flown in the most demanding environments and understand that safety should empower, not paralyze, action.

We see a future where birds aren't shot down, drones aren't banned indiscriminately, and safety doesn't mean fear. With PRIMUS, we provide decision-makers with a real-time, ethical view of what's in the sky, enabling them to act with precision, not panic.

**This is more than innovation, it's a new way to think about our shared airspace.**

## SYSTEA S.P.A.

SYSTEA S.p.A. develops and markets worldwide analytical instruments measuring around sixty chemical parameters in water, for routine laboratory, on-line, in-situ and portable field applications, providing a complete start-up, management and maintenance service to the Customer, through our international network of trained commercial partners. Our Micromac on-line analyzers are applied for control of chemical parameters in WWTP effluents, potabilization plants, rivers and lakes; our Easychem multiparametric on-line analyzers provide innovative parameters detection including acute toxicity, Total Coliforms, E.coli and Faecal coliforms. Our WIZ in-situ nutrients probes are scientifically recognised leading tools for coastal water monitoring and eutrophication control.

Micromac 2000 line of digital sensors, probes and measurement devices is applied for drinking, surface and waste water effluents control, including local monoparametric and multiparametric controllers. All the devices allow data acquisition by Modbus 485 industrial protocol; the optical sensors and probes are equipped with mechanical wipers for periodic autocleaning and they can be deployed directly in water or mounted in customized flow-cells for extractive applications.

Easychem line of discrete routine laboratory analyzers to measure chemical parameters in water, including acute toxicity.

## TEKNOFANGHI SRL

Teknofanghi, founded in 1987, specializes in the design, manufacture, and supply of advanced equipment for sludge and wastewater treatment plants. With more than 38 years of expertise, the company has achieved over 15,000 installations across 100+ countries, establishing itself as a global leader in sludge dewatering and water microfiltration solutions.

Our product range is engineered not only for quality and durability but also to optimize energy and water consumption while minimizing chemical use—ensuring efficient and sustainable operations for our clients worldwide.

Core product lines include:

- SCRUDRAIN® – Rotary drum thickeners with Archimedean screw for increased sludge concentration.
- MONOBELT® – A unique compact system combining a drum thickener and a belt press.
- SCRUPRESS® – Screw presses with compact design for automatic sludge dewatering.
- TEKNOBAG-DRAIMAD® – Sludge dewatering system with draining bags.
- POLYDILUTION® – Automatic polyelectrolyte preparation systems (powder and emulsion).
- SCRUFILTER® – Continuous microfiltration drum system for small plant applications.
- TEKNODISK® – Continuous microfiltration disc system for medium and large plants.

With a strong reputation for innovation, reliability, and sustainability, Teknofanghi continues to provide cutting-edge solutions that meet the evolving needs of wastewater treatment facilities worldwide.

## TOPVIEW SRL

TopView, founded in 2013, is an innovative SME specializing in Unmanned Aircraft Systems (UAS) engineering and digital aviation. The company develops advanced drone solutions tailored for the renewable energy sector, helping businesses and institutions improve efficiency, safety, and sustainability.

Our expertise spans three core areas:

- **Specialized Drone Flight Operations** – Optical and thermal inspections, aerial photogrammetry, and high-precision surveys for photovoltaic plants, onshore/offshore wind turbines, and energy infrastructures. These services enable early fault detection, faster maintenance, and reduced downtime.
- **IoT Systems & Smart Payloads** – Design and integration of real-time sensors for predictive maintenance and resource optimization. Proprietary technologies such as PV-Watch enhance renewable energy plant performance.
- **U-Space & Digital Aviation** – Active participation in European R&D projects to build safe, scalable frameworks for drone integration into low-altitude airspace, unlocking new opportunities for energy and environmental applications.

With over 200 experimental missions, 15 European projects, and innovations like Pollicino Remote ID, TopView is at the forefront of drone innovation. Our mission is to empower the renewable energy sector with scalable, reliable, and sustainable UAS solutions.

**DELTAFUSE** *Evolution*

**DELTONE** *System*

Unidelta was founded in Vestone (Brescia) in 1973 with the production of polyethylene pipes.

Today, Unidelta manufactures:

- High and low density polyethylene pipes (PE 100, PE 100 RC-RD and PE 40)
- Polypropylene compression fittings, universal transition joints, clamp saddles and valves (ball, check and stop cock valves)
- Electrofusion fittings, butt fusion and transition fittings
- PE-X - PE-RT - PE-RT/Al/PE-RT pipes and brass press fittings for domestic sanitary use, heating and cooling systems

Unidelta operates in full compliance with the UNI EN ISO 9001:2015 quality system regulations, to which it has been certified since 1995. It also boasts additional certifications such as ISO 14001 and ISO 45001:2018.

## VALVEIT SRL

HVAC valves · Water Treatment & Wastewater Treatment valves · Desalination valves

valveIT is an high-quality Italian valve manufacturer with more than 15 years of records in delivering projects for:  
HVAC | Water & Wastewater Treatment | Desalination

The #valveITway is our project planning method, designed to ensure seamless execution for Engineering, Procurement, and Construction (EPC) contractors. This approach guarantees highly customized products that meet exact client specifications while achieving outstanding customer satisfaction.

Our process covers every phase—design, manufacturing, coating, assembling, testing, packing, and after-sales service—resulting in a unique range of tailor-made valves.

valveIT's portfolio includes customizable solutions from standard static valves (gate valves, check valves, strainers, etc.) to specialized products such as high-accuracy DRVs, butterfly valves, and high PN rated valves.

## WESTRAFO S.R.L.

Westrafo is a constantly evolving company, focused on innovation in the electrical transformer industry, with a direct presence in Europe, North America, and Africa. With a sustainability-driven approach and a strong commitment to energy efficiency, we develop advanced integrated solutions for the energy industry, including transformers for data centers, battery storage, and solar plants.

Our international presence and ability to adapt to the specific needs of each market allow us to be a key reference point for clients worldwide. Wherever there is a need for integrated and customized energy solutions, we are ready to provide a 360-degree service, from the initial study phase to the final commissioning.

Over the past four years, we have ranked among the top Italian and European companies in terms of growth rate, with a CAGR of over 52%, confirming a positive trend and the strength of our development strategy.

## ZERYNTH

Zerynth is revolutionizing industrial manufacturing with a Manufacturing Intelligence platform that combines IoT and AI. Our mission is to support companies in their digital transformation by seamlessly connecting any machine to a powerful Industrial AI system. With the launch of Zero, the Industrial AI Copilot, we are positioning ourselves as a leader in Industrial AI, driving efficiency and sustainability.

Our platform enables real-time machine performance monitoring, advanced KPI analysis (such as OEE), and proactive maintenance. Zerynth helps manufacturers collect and analyze data for instant performance visibility. It integrates seamlessly with ERP, MES, and BI systems, enhancing operational insights and improving planning accuracy.

Founded in 2015 in Pisa, Italy, Zerynth serves over 150 customers across multiple industries.
